Coral LLC Provides Coral Calcium Products Free of Contaminants, Safe for Oceans

May 13, 2015

Leading supplier of coral minerals uses EcoSafe™ above-sea coral for supplements, toothpaste and more

Labels such as “local,” “free-range,” and “Non-GMO” have helped raise consumers’ awareness about their food – where it comes from, what it’s been exposed to and, in some cases, its environmental impact.

But are we paying as much attention to some of the other products we put in our bodies, from supplements to toothpaste? **Coral LLC, the largest supplier of above-sea EcoSafe™ coral minerals, is.**

The family-owned company based in Carson City, NV, offers an array of products – including mineral-based supplements and toothpaste – that **boast the healthful benefits of coral minerals, are safe for consumers, and leave the world’s beautiful under-sea coral reefs pristinely untouched.**

Coral minerals have been known* to help enhance wellbeing by promoting bone health, providing essential nutrients for optimal brain function, supporting a healthy immune response, and perhaps most importantly, assisting in changing the body’s pH level; however, these potentially life-changing minerals can also be tainted with pollutants and devastating to the marine environment when harvested improperly.

Coral Pic 1

In fact, most coral minerals today come from environmentally hazardous areas found "under the sea," which are often contaminated from years of pollution and are harvested in an aggressive manner that is destructive to living coral reefs.

In contrast, Coral LLC only uses coral minerals obtained above the sea (not in the ocean), which are unaffected by underwater pollution and harvested in an eco-friendly manner.

Coral LLC is currently certified by Friend of the Sea, a non-profit, non-governmental organization (NGO) and international certifying program whose mission is to conserve the marine habitat. The company also recently joined forces with Ocean Conservancy, a non-profit organization that has

been working for over four decades to protect the health of the world's oceans.
