Coral Chewables Supplements

// September 2015

EMAIL SUBSCRIPTION 🔕

The new Coral Chewables supplement has a Bavarian cream flavor and delivers 500 mg of bioavailable coral calcium in addition to 73 other minerals. The above-sea coral calcium is intended to help patients reduce the risk of osteoporosis and achieve peak bone mass in the lower extremities and the entire skeletal system, and is harvested without harming delicate ocean environments. The easy-to-chew tablets are free of artificial colors and preservatives. Coral Chewables come in 120-count bottles and are available at natural food and vitamin stores, with a manufacturer-recommended price of \$14.95.
